

Materials

Note: 1/2 a yard of fleece will make two small-medium size heart toys, including stuffing.

Micro Fleece
Fabric Scissors
Pen or Fine Tip Marker
Heart Stencil (*optional, or freehand!*)

DIY: No Sew Heart Dog Toy Tutorial

1. Stack two layers of fleece on a flat surface and trace a heart shape with a fine tip marker or pen.
2. Keeping the two layers stacked, cut a circle approximately 2 inches around the outside the heart. We want to leave enough length to double tie our knots.
3. Cut two slits on the edge of the heart about the width of your finger.
4. Using the bottom and top pieces, tie a knot. Double knot it to make sure it is extra tight and secure. Repeat steps 3 & 4 until you have the majority of the heart tied.
5. With a small hole still remaining, fill the heart using your extra fleece as stuffing. – Avoid using tiny pieces as stuffing. Long wide strips work best!
6. Continue cutting and tying until the heart is completely sealed.
7. Trim the edges and start playing!

*Note: These DIY toys are **not** recommended for rough chewing. Remember to always supervise your pet during playtime.*
